the President of the Board of Education, in conformity with a resolution of that Board, passed June 4th, 1856, authorizing him thus to invest the moneys belonging to the School Fund as fast as they came into his hands. As the amount represented by these bills is understood to be a permanent loan to the government, I would recommend the passage of a law authorizing the Minister of Finance to give the Presilent of the Board of Education a credit on the books per cent. per annum, the interest to be calculated and payable semi-annually on the first days of and The imports for the two years ending December 31st, 1857, have been as follows: \$1,152,412 99 1,130,166 41 \$2,282,578 40 The experts for the same period have been as follows:
In 1856, of For'n Goods, \$204,545 88
" Dom. " \$78,968 34—\$583,544 22
In 1857, of For'n Goods, 222,222 19
" Dom. " 423,303 91— 645,525 10 howing excess of Imports to be orts for the last five years were as follows: orts for the same years were as follows 274,029 70 274,792 67 - 572,652 222,222 19 A42,303 91

domestic goods during the two former that 258,479 88 more than those of 1854 and Is 258,479 88 more than those of 1854 and Is This is a very gratifying fact; for it proves conclisively that during the last two years the productive powers of the kingdom have been increasing rapidly while during the same period, our dependence upon fareign countries, as shown by the imports, has been diminished to a large extent. fireign countries, as shown by the imports, has been diminished to a large extent.

The great desideratum of the kingdom, is an increase in the amount and variety of our exports. The great desideratum of the kingdom, is an increase in the amount and variety of our exports. The circumstances are such, that for many years, we must expect to be dependent upon the great manufacturing countries of the world for a large portion of articles both of necessity and luxury, which enter to the daily consumption of all classes of our people. The importation and purchase of these articles institute a heavy debt against us which it is our years well as our interest to meet mainly by our ports. In order to be enabled to do this, our agriphtural and planting interests, which constitute almost the only internal resource to which we can look, with reasonable confidence for the means of paying its debt, must be encouraged and fostered by all the teans in our power. The productions of our soil, the markets of those countries from which we receive the heaviest importations; and nothing is wanting but an increase of vigor, energy and industry on our two part, in the cultivation of our soil, to enable us, by the export of our own products, to diminish

From the above statement of the awill perceive that the state of our mas materially improved during the last for while our imports in 1856 and 1857 513 73 less than those of 1854 and 1855.

but an increase of vigor, energy and industry on our own part, in the cultivation of our soil, to enable us, by the export of our own products, to diminish creatly, if not extinguish entirely, the present heavy balance of trade against us.

Another interest which has lately sprung up imongst us, and which promises to become of the highest importance to the kingdom, deserves also your attentive consideration. I allude to Hawaiian whaling. Our whaling fleet now numbers fifteen vessels. Our troximity to the whaling grounds, and our facilities, resent and prospective, for the fitting out of whale tips, are likely to attract to us foreigners possessed the capital, skill and resources necessary for the saful presecution of this profitable branch of the capital from foreign sources is, in a national point view, as valuable to us as if it belonged to our own cople, for if invested in this business, it must necessary lead to an increased demand for all those of our products which are employed in it, hereby furm ing for our own people that best of all narkets—a hole market. It will be for you to enquire into the papiety and expediency of encourating this business amongst us by giving Hawaiian sallors in vessels toder the Hawaiian flag, some privileges and exemption not accorded to them when using unfer the flag of other nations.

You will have a hose above stated, that the mount of Excheque was a shove stated, that the mount of Excheque was above stated, that the mount of Excheque was above stated, that the mount of Excheque was a shore stated, that the mount of Excheque was a shore stated by the last Legislature was \$15,160, at an a sanonal interest demanded for a season to the last the sanonal interest of about its 16 per cent. The man of interest demanded for a season to the last the sanonal interest of about its 16 per cent. The man of interest demanded for a season to the last the sanonal interest of about its 16 per cent. The man of interest demanded for a season to the sanonal interest of about its 16 per cent. Th

PUBLISHED WEEKLY BY HENRY M. WHITNEY.

HONOLULU, HAWAIIAN ISLANDS, JUNE 24, 1858.

Business Cards.

\$2,150 have been issued since the 1st of April, 1858, all bearing interest at the rate of twelve per cent. per annum. It is gratifying to state that the interest on them all has been promptly paid upon presentation

them all has been promptly paid upon presentation of the coupons.

The improvement of the Waikahalulu water lots has been steadily progressing since the completion of the dredge boat. By reference to the report of the Superintendent of the Bureau of Public Works, you will perceive that within the past year more than 1500 running feet of coral stone wall, averaging fourteen feet in height and seven feet in width, have been laid. Up to the time when the wall was completed, the operations of the dredge coat were limited principally to clearing the mud from the bottom where the wall was to be laid, but, since the completion of the wall, the filling in has been progressing rapidly. Over 70,000 cubic yards of earth have been taken from the harbor, and deposited on the reef within the Over 70,000 cubic yards of earth have been taken from the harbor, and deposited on the reef within the wall at a cost of about 45 cents per yard. The expenditure for this important work has thus far been heavy, but in order to arrive at a correct estimate of its cost, it must be borne in mind that the expenses of the steamer Pele for coal, salaries, wear and tear, &c., have been borne by the appropriation for dredging the harbor, and that, consequently, her receipts for towing ships, amounting to \$14,120, ought to be deducted from the amount expended on that appropriation.

In the present state of this improvement, twenty lots are so far completed as to be nearly all ready for market. The manner of disposing of them became, some time ago, a question of great interest in His Majesty's Cabinet, and after mature reflection, it was decided that leases of them should be sold for a limited term of years, the Government imposing upon the purchasers certain conditions as to the quality of buildings (if any) to be erected on them, with the stipulation that at the expiration of the leases the buildings or other improvements on them should revert to the Government. In coming to this decision, His Majesty's Cabinet were influenced mainly by con-siderations of revenue. It was deemed better for the interests of Government to dispose of them in such a manner as to secure a certain definite annual revenue, than to relinquish all hope of future income from

them which would have been the sample. This plan of disposing or tuem has, however, been so far modified as to permit the sale of them in fee simple to per sons who may prefer such a title.

The Registrar of Public Accounts was directed sometime ago to prepare tables showing the actual amount of the revenue received from, and the actual amount of expenditure in, each of the four great divisions of the kingdom during the two years ending

ab 21 1858. These tables have been prepared with great labor, and he pended them to my report, but the late period at which it goes to press must preclude the publication of them at present. A manuscript copy of them will, however, be sent to each House. They show the fol-

Revenue	from Cahu,		180	-	\$474,347 94

March 31, 1850, (as per Table D.) are -The estimated expenditures for the same period, (as per Table E.) amount to \$736,087 88

To which add Balances of Appropriations of 1856, due and unpuid March 31, 1858, (as per Table C.) 2,579 04

Leaving the sum of excess of estimated expenditures over estimated receipts. It must be borne in mind, however, that these es-timates are based upon the tariff and rates and taxa-tion now existing. Under the provisions of the New Code, (if passed.) our revenue from taxes and other sources, will be somewhat increased. The ratification of the new French Treaty too, will enable us to bring of the new French Treaty too, will enable us to bring into force the new Tariff Bill, passed at the session of 1855, by which our revenue from duties will be still further augmented. But as there is some uncertainty as to the period when these sources of increased revenue will become operative, and as the amount of increase which they will effect when in force, cannot now be accurately estimated, it is not deemed advisable, at this time, to recommend to you any definite measures
